Style Number: 3000FT
Service: Pump and Valve Packing
Product Type : Braided Packing

Description:
Braided from a high temperature blended fiberglass yarn, Style 3000FT is impregnated with PTFE and a proprietary inert lubricant. Style 3000FT packing is also a non-staining and non-contaminating packing with excellent heat dissipation properties. A durable and resilient packing for general service applications such as centrifugal, rotary, and reciprocating pumps, as well as valve service. Our proprietary lubricant is used for extremely low friction at startup and during operation.

Construction:	Interlock Braid
Temperature Rating:	500º F / 260ºC
pH Rating:	2 – 12
Shaft Speed Rating:	2200 FPM / 11 MPS
Pressure Rating:	500 PSI / 34 BAR
