Style Number: 330
Service: Pump and Valve Packing
Product Type : Braided Packing

Description:
Braided from Lenzing's polyimide yarn and lubricated PTFE filament, Style 330 is not only extremely abrasion resistant, but easy on shafts and sleeves. A high speed lubricant is added prior to braiding to ensure quick break-in and low friction during operation. Extremely durable and easy to cut and install, Style 330 is ideal for most applications where chemical and abrasion resistance are required. Commonly used for stock pumps, slurry pumps, pulpers, digesters, agitators and mixers.

Construction:	Interlock Braid
Temperature Rating:	550º F / 290ºC
pH Rating:	0 - 12
Shaft Speed Rating:	2950 FPM / 15 MPS
Pressure Rating:	4000 PSI/275 BAR Valve 500 PSI/34 BAR Pump
